SUMMARY

Aspiring Software Developer with a strong foundation in Computer Engineering, pursuing a Bachelor's degree at the Royal Institute of Technology in Stockholm. Experienced in developing full-stack applications using Java, JDBC, JSP, and a three-tier architecture, with hands-on knowledge in distributed systems, database management, and optimization. Having worked at Bauhaus, I have cultivated strong teamwork, customer service, and logistics skills, adding a versatile edge to my technical background. Proficient in languages such as Java, C++, and Python, and deeply passionate about problem-solving, scalability, and innovation. Eager to contribute to cutting-edge projects that drive business impact and personal growth in dynamic environments.

EXPERIENCE

Store Associate 05/2024 - 08/2024

Bauhaus Stockholm, Sweden

- Managed warehouse logistics, including unloading and organizing goods to maintain efficient operations.
- Provided excellent customer service by assisting customers with product information and fulfilling their needs.
- Maintained inventory accuracy and ensured the cleanliness and orderliness of the storage area.

Systems Developer 01/2022 - 04/2022

Nordicbox.se (Sisu Net AB) Stockholm, Sweden

- Developed components for an internal ERP system for telecommunications distribution.
- Gained experience building APIs and programming according to an existing style guide.
- Regularly engaged in pair programming, improving communication and collaboration skills.

EDUCATION

Bachelor's in Computer Engineering 2022 - Present

KTH Royal Institute of Technology Stockholm, Sweden

STRENGTHS

- Full-Stack Development**
Skilled in building scalable web applications using Java, JDBC, JSP, and three-tier architecture.
- Problem-Solving**
Strong in algorithms, data structures, and optimization to create efficient, scalable solutions.
- Team Collaboration**
Effective team player with experience in cross-functional environments, ensuring successful project outcomes.

SKILLS

C++ · Java · JDBC · JSP · Python ·
Full-Stack Development ·
Object-Oriented Design ·
Data Structures & Algorithms ·
Relational Databases ·
Version Control ·
Problem Solving & Debugging ·
Customer Service & Teamwork ·
Agile Methodologies

KEY ACHIEVEMENTS

- Developed a full-stack webshop project**
Designed and implemented a scalable three-tier architecture using Java, JDBC, and JSP, enhancing user experience and optimizing database management for a smoother online shopping experience.
